Terry,

For TU-79, the Sample ID is HPPG-ESU-TU079A-001.

For TU – 124, the Sample ID is HPPG-ESU-TU124A-021.

V/r,
Paul

Subject: [Non-DoD Source] Re: HPNS Parcel G Sr-90 Results

Hi Paul,

Thank you for the information. Can you share the sample IDs of those soil samples with Sr-90 concentration above the remedial goals? Thanks again!

Best,

Terry

Wayne/Nina/Terry,

For trench units TU-79 and TU-124, analytical results for Sr-90 in one sample each were above the remedial goal, 0.334 pCi/g and 0.451 pCi/g, respectively. Because of the uncertainty in the lab results, four additional aliquots from each of the homogenized soil samples were analyzed. All of the eight aliquot sample results were below the Sr-90 remedial goal, confirming that diffuse Sr-90 concentrations were not above the remedial goal at these two sample locations.

A complete data package is being prepared by Aptim to present the results. In the meantime, please let me know if you have any questions and we can discuss further on today's call if needed.

V/r,

Paul Stoick, P.E.
